HELP US HELP THE ANIMALS OF

BREVARD COUNTY!

Meet Carter, a two year old Tan & Black Mouth Cur. Carter is a happy boy, despite his rough past. He was dumped at the gate box at the Brevard County Animal Shelter and wasn't given a long enough change to get adopted and find his forever home. He was put on the euthanasia list within a month of being at the shelter, before he was pulled out just in

Carter has a great temperament and is your typical love bug. He will often tell you it's time for a belly rub and he wants nothing more than to give LOTS of kisses. He does very well with female dogs and children. He would probably do best in a home without another male

being the leader. Carter is very docile for a two year old, yet can be playful when he wants to be, which makes him an all-around great dog. He is neutered and up to date on shots, however he is heartworm positive and currently on treatment. Don't let that stop you though, this handsome guy should be in great shape in no time and ready for you to come meet him!

Is Carter the one for you? Contact HOPE if he is!

A 5 kitten litter saved this week—1 had to be isolated for awhile—all had Upper Respiratory Infections.... Donations allow us to save cats!

Meet Gemini— boy what a week here at HOPE! We took in 20 cats and 2 dogs this week! Gemini was one of those cats. Gemini is a female and has a few issues we will resolve before finding her a home but it won't take long so if she is your girl you need to contact us! This poor girl went through a lot before we took her in. She was found in the drainpipe near a local restaurant by one of our supporters. She needed some medical care—she has an umbilical hernia which has to be surgically fixed, she needs to be spayed and her ears—the poor cat ... the stickiest ears I've ever seen, just so much junk in those poor little ears. Things will progress for Gemini and we will eventually find her a nice home to live in where she has proper care.

Contact HOPE if you think Gemini is for you!
